J-Stadium

Clients	J-Stadium
Project Description	Intermediary Application for Crane Rental
Members	4
Position	Software Developer
Responsibilities	Develop the admin module Implement several user features Optimize code Fix bugs
Technologies	PHP, Laravel, Blade + Vue.js 2, Tailwindcss, JQuery

Ainavi

Clients	Steerlink
Project Description	Intermediary Application for Truck Rental and Sales
Members	3
Position	Software Developer
Responsibilities	Implement user interface Develop user and admin modules Write APIs for the app Optimize code and fix bugs
Technologies	PHP, Laravel, Blade + Vue.js 2, Tailwindcss, JQuery

Tainavi

Clients	Goodfellows
Project Description	Products related to solar energy solution orders Includes multiple sub-modules: tainavi.com, tainavi-battery.com, tainavi-next.com, tainavi-pp.com, tainavi-switch.com
Members	3
Position	Software Developer
Responsibilities	Optimize code and fix bugs Implement landing page interface Develop new features Upgrade versions
Technologies	PHP, Laravel, Wordpress, Smarty, Zend 3, JQuery

KRH

Clients	Ashiba crowd
Project Description	Intermediary Application for Scaffolding Rental
Members	4
Position	Software Developer
Responsibilities	Analyze and design the system Design the database Develop modules for renters and lessors Implement the entire website interface
Technologies	PHP, Laravel, Vue.js 2, Bootstrap, JQuery

Qualiagram

Clients	Docomo
----------------	--------

Project Description	Online Video Call Application for Customer Support
Members	4
Position	Software Developer
Responsibilities	Implement the user interface Authenticate accounts via Cognito Develop features for administrators
Technologies	PHP, Laravel, Vue.js 2, Bootstrap, Jquery, Cognito, Chime

123Job

Clients	VNP Group
Project Description	Intermediary Job Search Application Connecting Job Seekers and Employers
Members	8
Position	Software Developer
Responsibilities	Develop the job seeker module Develop the employer module Develop the CV search module Develop the admin module Develop the CV statistics module Develop the company review module Develop the recruitment services module Develop the job seeker community module Develop the API module Guide interns and review code Optimize code and fix bugs Deploy project code
Technologies	PHP, Laravel, Blade, Bootstrap, Elasticsearch, Jquery

DESIRED WORK ENVIRONMENT

I aspire to work in a dynamic, young, and friendly environment where teamwork is valued, and I can collaborate with experienced and highly skilled colleagues. This would be an opportunity for me to continuously learn, develop myself, and enhance my professional skills.

I look forward to working at a company that prioritizes human development, has a clear career roadmap, provides transparent promotion opportunities, and offers excellent benefits. Such an environment would enable me to dedicate myself fully and create sustainable value for the organization
